Doctor and Patient.

"Save me, doctor, and I'll give you a

thousand dollars."

The doctor gave him a remedy that eased

him, and he called out:

"Keep at it, doctor, and I'll give you a

check for five hundred dollars!"

In half an hour more he was able to sit

up, and he calmly remarked:

"Doctor, I feel like giving you a fifty dol-

lar bill."

When the doctor was ready to go the

sick man was up and dressed; he followed

the doctor to the door and said:

"Say, doctor, send in your bill the first of

the month."

When six months had been gathered to

Time's bosom, the doctor sent in a bill

amounting to five dollars. He was pressed

to cut it down to three, after so doing he

sued to get it, got judgment, and the pa-

tient put in a stay of execution.—Ex-

change.

One Hundred Years Ago.

One hundred years ago not a pound of

coal, not a cubic foot of illuminated gas had

been burned in this country. No iron

stoves were used, and no contrivance econ-

omizing heat employed until Dr. Franklin

invented the iron framed fire place, which

still bears his name. All the cooking and

warming in town and country were done

by and of fire kindled in the brick oven or

on the hearth. Pine knots or tallow can-

dles furnished the light for the long win-

ter nights, and sanded floors supplied the

place of rugs and carpets. The water used

for household purposes was drawn from

deep wells by the creaking screw. No

form of pump was used in this country, so

far as we can learn, until after the com-

mencement of the present century. There

were no friction matches in those early

days, by the aid of which fire could be

easily kindled; and if the fire went out

upon the hearth over night, and the under

was damp, so that sparks would not catch,

the alternative was presented of wander-

ing through the snow a mile or so to bor-

row of a neighbor. Only one room in any

house was warm, unless some of the fam-

ily were ill. In all the rest the tempera-

ture was at zero many nights in the win-

ter.

Great Apple Crop.

From the New York Sun.

This year's apple crop is now gathered,

and it is one of the richest the country

has ever had. In some regions apples are

so plenty that they are fed to pigs, cows

and horses, and the cider mills are every-

where pressing out more cider than they

can readily dispose of. This very palatable

and healthful drink may be bought in the

country at \$1 and \$1.50 a barrel, and

it ought to be on draught in cities at a price which would

tempt the poorest customers. There is no

need of anybody's drinking sham cider

this year. The real juice of the apple is

plenty, enough for any demand there is

likely to be for it. A splendid apple crop

can fortunately now be disposed of to

much better advantage than formerly. An

extensive European demand for our

apples has grown up within recent

years, and this autumn we are exporting

more of them than ever before, though the

prices are very low, running as low as

seven cents a bushel, or \$1.02 a barrel, ac-

cording to the quality, so great is the

supply. Vast quantities of apples are

regularly shipped to Europe by steamer.

The manifest of one vessel from this port

last week showed that she carried 4,671

barrels, and all the out-going European

steamers are weighted with them. The

Boston steamer took 5,000

barrels last Wednesday, the largest ship-

ment of apples ever made from that port.

Three ship lines from Boston

have engaged to carry more than 40,000

barrels, and the export from New York

will reach an enormous and unprecedented

total. If the crop is carefully selected

and packed, it reaches Europe in good con-

dition and brings a fair profit to the sender.

Apples ought to be plenty and cheap in

England this autumn.

The City Vote for Water-Works by Five to One.

The Details of the Victory.

With the going down of the sun last evening and the closing of the polls, the excitement and enthusiasm attending election day was given a new impetus. The business streets were thronged with anxious inquirers as to the results of the day's work, and the glad news that the Republicans had won an even greater victory than was expected, was quickly passed along the line of eager questioners. Bonfires were soon blazing, cannons roared, the band tooted, small boys yelled, and big boys cheered. Honest money Democrats and staunch Republicans clasped warm palms and shook hands in mutual glee at the utter rout of fiatism. The Gazette office was thronged with those anxious to learn the details, while in front of the Myers house stood a large crowd dividing their time between listening to the enlivening music of the Bower City Band, and in talking over the glorious victory. As little by little the glad news became confirmed, and the reports grew even brighter and brighter, the enthusiastic crowd spied the form of A. P. Lovejoy, the newly-elected member of the Assembly, and a shout was raised for a speech. Mr. Lovejoy responded in a brief and highly appropriate speech, which was short and to the point. He thanked the people for the honor conferred, and pledged himself to act for the best interests of his constituents, and then withdrew. By this time returns began to come in and the band entered Lappin's hall, followed by the crowd who packed the hall until there was not a vacant seat and hardly any standing room either in gallery or on the main floor. Hon. James Sutherland presided, and read such returns as were received. The reports were greeted with cheers.

Hon. J. R. Bennett, Dr. Martin, H. H. Blanchard, William Hodson, and others were called out by the crowd for speeches and made happy remarks, which served to while away the time between the receiving of reports.

The Bower City Band also did good service. They gave entertaining music at frequent intervals, and were greeted with generous cheers. A large number of boys and hoodlums were unfortunately admitted to the hall, and they indulged in a series of howls and cat-calls, which disgraced them greatly, and which sadly annoyed those who had gathered there for a legitimate purpose. It was finally announced that Mr. Lovejoy had gone down stairs and was going to open several barrels of apples for the boys.

The youths then made a rush for the street, and this appeal to their stomach proved more effectual in restoring order, than all the appeals put to their heads. The ruse worked well, and the boys were satisfied to munch their apples on the curbstone, instead of kicking their heels and cracking their throats in making unearthly noises in the hall.

The gathering broke up about 11 o'clock, and an hour later the city was wrapped in its usual midnight quiet and slumber.

The following are the facts on which the jubilation is based:

THE WATER WORKS.

The question of for or against water works was one which caused no little discussion yesterday, and in the earlier part of the day it seemed the overshadowing and all important issue. Quite a full vote was polled, and the Council cannot complain now that they know not the will of the people. The question was virtually narrowed down to the issue of whether or not the city should allow some company to build water works here, and agree to pay them for the use of hydrants for fire purposes, an amount not to exceed the amount now paid the Fire Department. On that issue the following was the vote, by wards:
